# WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCT/IL05/00558

Box No. I Basis of this opinion
1. With regard to the language, this opinion has been established on the basis of:
the international application in the language in which it was filed
a translation of the international application into, which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)).
2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:
a. type of material
a sequence listing
table(s) related to the sequence listing
b. format of material
on paper
in electronic form
c. time of filing/furnishing
contained in the international application as filed.
filed together with the international application in electronic form.
furnished subsequently to this Authority for the purposes of search.
<u> </u>
In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.
4. Additional comments:

### WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/IL05/00558

Box No. V Reasoned statement under Rule 43 bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement		
Novelty (N)	Claims 8,9,15-36, 44-53	YES
	Claims <u>1-7, 10-14, 37-43</u>	NO
Inventive step (IS)	Claims NONE	YES
	Claims <u>1-7, 10-14, 37-43</u>	NO
Industrial applicability (IA)	Claims <u>1-53</u>	YES
	Claims NONE	NO

#### 2. Citations and explanations:

Claims 1-7, 10-14 and 37-43 lack novelty under PCT Article 33(2) as being anticipated by Nigam (US 6,291,023). Nigam teaches the steps of contacting a surface to be printed with wetting composition and applying liquid ink on the surface to form an image (Nigam, col.5, lines 20-40).

Claims 1-7, 10-14 and 37-43 lack novelty under PCT Article 33(2) as being anticipated by Berndtsson et al. (US 2005/0098054) teaches the steps of contacting a surface to be printed with wetting composition and applying liquid ink on the surface to form an image (Berndtsson et al., see the abstract and paragraphs [0030] and [0032]).

Claims 8,9, 15-36 and 44-53 lack an inventive step under PCT Article 33(3) as being obvious over Nigam (US 6,291,023). To modify the wet composition with the selection of desired weight, liquid ink composition, surface tension, solvent, boiling temperature for the solvent and the adhesion promoting agent would not involve an inventive step since the selection can be obtained through routine experimentation depending on the medium to be printed in order to get best possible print quality.

Claims 8,9, 15-36 and 44-53 lack an inventive step under PCT Article 33(3) as being obvious over Berndtsson et al. (US 2005/0098054). To modify the wet composition with the selection of desired weight, liquid ink composition, surface tension, solvent, boiling temperature for the solvent or the adhesion promoting agent would not involve an inventive step since the selection can be obtained through routine experimentation depending on the medium to be printed in order to get best possible print quality.

## WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCT/IL05/00558

Box No. VII Certain defects in the internat	tional application	1
---	--------------------	---

The following defects in the form or contents of the international application have been noted:

Claim 43 is objected to under PCT Rule 66.2(a)(iii) as containing the following defect(s) in the form or contents thereof: There is no proper antecedent basis for "the surface and catalyst for promoting said chemically interacting" (lines 2 and 3).

The description is objected to as containing the following defect(s) under PCT Rule 66.2(a)(iii) in the form or contents thereof: the numerical reference "19" is assigned to the spraying nozzles (pages 48, 49 lines 2, 6) and an ironing unit (page 45, third paragraph). Additionally, the "raised portion" is assigned to both references "40" and "49". The above are simply examples of the errors present. Applicant is required to carefully review and eliminate all such errors.

Form PCT/ISA/237 (Box No. VII) (April 2005)
